3. QUESTIONS AS TO BID DOCUMENT. If a bidder finds discrepancies in, or omissions from, the bid document or has questions about the project, he should at once contact the appropriate Engineering Department. If the information requested or change made is substantive, the Board will issue an amendment to the solicitation and will send such amendment to all potential bidders, who have procured a bid documents. The Board and the City will not be responsible for any oral instructions.

4. AWARD OF CONTRACT (TIMELINESS, RESPONSIVENESS, AND, RESPONSIBILITY). A contract will be awarded to the lowest and best timely bidder, who is also responsive and responsible. If bids are otherwise equal, award will be made to that bidder granting the largest prompt payment discount.

In order to be responsive, the bidder must complete all blanks requiring completion, and must submit all information required to be submitted. An alteration, erasure, or interlineation may cause the bid to be determined non-responsive.

However, The Board reserves the right to accept, reject, and waive defects or irregularities on any bid.

7. DETERMINATION OF RESPONSIBILITY. Prior to awarding any contract pursuant to this Bid, The Board will make a determination of responsibility. An award of a contract to a bidder shall constitute an affirmative determination of responsibility.

In reaching a determination of responsibility, The Board can consider among other factors:

- (a) The Contractor's record of integrity.

- (c) The Contractor's financial status.

That pre-award survey may examine any of the considerations relating to a bidder's responsibility as set forth above. Bidders will cooperate with the pre-award survey. Failure to cooperate can result in a finding of non-responsibility.

The bid bond or certified check shall serve as a guarantee that should the said bid be accepted by The Board, the bidder will, within ten (10) days after the time he is notified of the acceptance of the bid, enter into a contract with the City of Fort

Wayne for the work bid upon and give bond with surety to be approved by The Board, insuring the faithful completion of the contract.

In case a bid is not accepted, the obligation of the said bond shall be null and void or the certified check will be returned to the bidder, as the case may be. In case a bid is accepted, and the bidder does not enter into a contract with the City of Fort Wayne for the work bid upon within ten (10) days after notification of award, then the obligation of the bond or the certified check shall be forfeited to the City of Fort Wayne for ascertained and/or liquidated damages for failure to enter into a contract. The City of Fort Wayne

Board of Public Works and Safety

TO ALL CONTRACTORS WITHIN THE CITY LIMITS OF FORT WAYNE

The City of Fort Wayne Street Department has advised the Fort Wayne Board of Public Works and Safety that the third trick Street Department crews are spending approximately 50% of their time re-erecting barricades placed on various projects throughout the City. This responsibility of maintaining construction signs, barricades, etc., belongs entirely with the contractor.

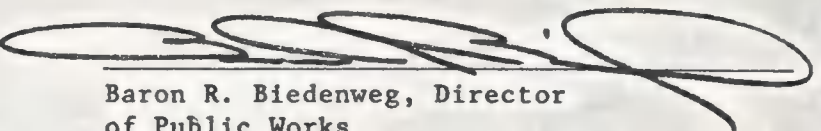

Please refer to the attached copy of the City of Fort Wayne application for permit to cut into Fort Wayne streets, whereby the contractor is responsible to erect and maintain Traffic Devices for Highway Construction and Maintenance Operations; Indiana State Highway Commission --- date, 1985.

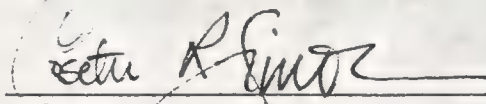

Maintaining these signs shall include necessary stabilizing of the signs whether this be accomplished by embedding the legs of the sign in the street or using sandbags as ballast on the lower crossarms or legs of the signs. Other procedures of installing ballast on signs may be devised by the contractor, however, under no circumstances, shall sandbag ballast be placed on the top of barricades. This has been determined as a hazard to the driving public. Should one of the signs be hit by a car, the sandbag could very well fly through the windshield of the car causing serious injury.

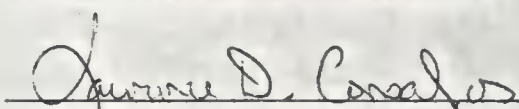

Effective January 1, 1987, a form will be included in bid documents requiring contractor to list name (s) and telephone number (s) of those responsible for maintaining barricades at all hours for each project.

If, after notification by City, contractor's representative does not immediately correct barricade problem and City must perform this work, a charge will be made against contractor.

SPECIFICATION AND SPECIAL PROVISION

Street Lighting Engineering Dept.

Resolution # 195-87 Amended II

The following special provisions are herein established in addition to the "General and Detailed Specifications", as supplemented, which is hereby made a part of the Contract Documents by reference and together will be referred to as the Standard Specifications. All work performed under this contract will be governed by the provisions of the Standard Specifications except as modified or amended by these Special Provisions or the Plans or other Contract Documents prepared specifically for this contract by the Board of Public Works of the City of Fort Wayne, Indiana, or an agent appointed by said Board.

The plans for this project, entitled Indian Village

Public Safety

If at any time, in the opinion of the engineer, the work is not properly lighted, barricaded and in all respects safe to public travel, persons on or about the work, or public or private property, the engineer shall have the right to order such safeguards to be erected and such precautions be taken as he deems advisable, and the contractor shall promptly comply with such orders. If, under such circumstances, the contractor does not or can not immediately put the same into proper and approved condition, or if the contractor or his representative are not upon the ground so that he can be immediately notified of the insufficiency of safety precautions, then the engineer may put the work into such a condition that it shall be, in his opinion, in all respects safe, and the contractor shall pay all expenses of such labor and materials as may have been used for this purpose by him or by the engineer. Such action of the engineer, or his failure to take such action, shall in no way relieve the contractor of the entire responsibility for any cost, loss, or damage by any party sustained on account of the insufficiency of safety precautions taken by him or by the engineer acting under authority of this section.

Protection to Property

Materials shall be neatly, safely and compactly piled up along the sides of the roadway in which the improvement is located or adjacent thereto, as the engineer may direct, in such a manner as to cause the least inconvenience and damage to property and to the general public, and not within fifteen (15) feet of any fire hydrant. Private drives and street crossings shall be kept open. Shade trees and other improvements shall be protected from damage. Injury to lawns, trees, sidewalks, street or other improvements shall be made good by the contractor to the satisfaction of the engineer. The contractor shall

at all times keep the work site clean and free of dust.

Co-operation with Utilities

The plans show all known utilities located within the limits of this contract according to information obtained from various utility companies. The accuracy of the plans in this respect is not guaranteed. The contractor will be required to co-operate his work with all utilities within the limits of this contract as directed by the engineer. The contractor is also required to locate all utilities forty-eight (48) hours before work commences by calling I.U.P.P.S. 1-800-382-5544.

Materials

The City of Fort Wayne, Indiana shall furnish all materials shown on the material schedule which is hereby made a part of the contract documents.

Aluminum Poles

All poles will be placed in a straight hole so that the bottom of the hand hole will be 8" from the top of grade. The hand hole will face the direction of incoming wire. The poles will be set in eighteen (18) to twenty (20) inches of polyurethane foam with a density of seven (7) pounds per cubic foot, to be furnished by the contractor. The remainder of the hole shall be filled with spoil to within two (2) inches of grade and compacted to ninety-five (95) percent dry density as determined by a modified proctor. All poles shall be plumb after installation of the post top luminaire. All poles shall be grounded. Poles shall be placed at locations shown on plans or as designated by engineer.

Trenching

All trenching shall be twenty (20) inches deep parallel to the street and one foot from the face of the sidewalk. All backfill material shall meet the approval of the engineer. All backfill material will be compacted to ninety-five (95) percent dry density as determined by a modified proctor. The contractor shall compact said trenches within three (3) days after the initial opening of the trench and said trench shall be backfilled the same day that it is opened. If the contractor does not comply with the backfill requirements five (5) percent of the unit price shall be deducted from the bid for each foot of trench which does not pass inspection.

Conduit

Where existing pavement is encountered (sidewalks, driveways or streets) the contractor shall bore or jack new conduit under the pavement at a depth of twenty (20) inches. Any wire passing under the pavement shall be installed in said conduit. Where trees are encountered the contractor shall bore or jack new conduit under said tree at a depth of twenty inches. The conduit length shall be computed as follows: trees sixteen (16) inches and larger (O.D. + 12 feet); trees fifteen (15) inches and smaller

(O. D. + 6 feet).

Luminaire

The contractor shall include in his bid for the installation of the luminaire all necessary connections required to make the luminaire operational.

Underground Wire

Underground wire shall be buried twenty (20) inches deep. The contractor shall install five (5) feet of wire into the pole. All wires shall be protected at all times. There shall be no splices made in the cable or connection made in the ground. All connections will be made in the hand hole or in a specified hand hole in the ground.

Landscaping

The areas disturbed by the contractor shall receive a minimum of two (2) inches of loamy soil of a density of one hundred twenty five (125) pounds per cubic foot. The area shall be fine graded, fertilized, rolled and lightly mulched. Grass seed shall be sown at a rate of six (6) pounds per one thousand (1000) square feet of area. The seed mixture shall be as follows: 2 lbs./1000 sq. ft. chewing fescue; 2 lbs./1000 sq. ft. perennial rye; 2 lbs./1000 sq. ft. kentucky bluegrass. The fertilizer shall have a 4-16-16 analysis and be applied at the rate of five (5) pounds per one thousand square feet.

Foundation

Where pole locations are to be in curb walk, pole will be set on 18" x 18" x 4' reinforced concrete bases with grounding anchor bolts and entry sleeves. The City shall furnish the anchor bolts and sleeves where required.

The Continuity Test shall be made with an Ohmmeter properly scaled for measuring the resistance of the Power Cables. This test shall verify the following:

1. That each Power Cable is continuous to all of its termination points.
2. That the cable coding at all the termination points is consistent with cable coding at the supply point.
3. That the power cables are not crossed with the Neutral or with each other.
4. That the Main Circuit through each of its branches does not have unusual resistance values.

The entire completed installation shall be tested by circuit or by such portions as may be selected by the Engineer.

Galvanized Steel Conduit in the road shoulders shall be in-

stalled in trenches excavated to a neat line but in the shoulder surface. The trench shall be backfilled with fill gravel, and compacted to original density and the surface will be replaced with like material of original thickness.

Pole Standards shall be plumb after installation of the Post Top Luminaires.

All Aluminum Standards shall be grounded.

Curbwalk

All curbwalk removed will be replaced in accordance to Street Engineering specifications. It is expected that the adjacent pavement will receive some damage. The contractor shall replace any pavement damaged with full depth asphalt to a width as required by the engineer. It should also be noted that the pavement replacement will be paid for under asphalt patching as will the replacement of pavement where it is required to trench in the street.

Progress Payments

This project is being financed by the Barrett Law revolving fund whereby the property owner will contribute \$3.27 per front foot of property abutting the project and the City shall pay the balance. The "revolving fund" provides for the City to hold all bonds which may be issued in payment of the property owners obligation thus assuring the contractor of a 100% cash contract. The contractor will be entitled to receive monthly progress payments, based upon an estimate of the work completed, approved by the engineer, and submitted to the Board of Public Works. These monthly progress payments shall not exceed ninety (90%) of the monthly estimate or the original contract sum which ever is the lesser.

Concrete Replacement

Where contractor finds it necessary to remove any part of a sidewalk to install conduit and/or cable for this job, it will be his responsibility to completely replace the sidewalk panels so damaged. Where it is necessary to cut driveways, streets, or alleys the trench will be overcut 8" on each side and replaced with concrete to the standing Street Department Specifications.

Controls

Contractor will install 2", 90 ell and one 10' length of conduit on Utility riser poles and will leave sufficient wire to reach top of pole. City will install additional conduit and control at City's expense.

REMOVAL

The City of Fort Wayne Maintenance Contractor will be responsible for removal of existing street light poles, fixtures, mast arms, etc., on the streets only in this area.

SALVAGE

All removal items designated as salvagable by the project engineer shall be delivered to the Street Lighting Warehouse. All other items are the property of the contractor. (See removal).

WAGE SCALE

There are two (2) wage scales enclosed in the bid document, Indiana-Fort Wayne Wage Scale and the Federal Wage Scale; the higher wage scale should be followed.

GENERAL PROVISIONS*
BOARD OF PUBLIC WORKS AND SAFETY
(NON-FEDERALLY FUNDED)

1. TIME AND PROGRESS. Time is of the essence in the completion of this project. The contractor shall begin promptly after receipt of a written notice to proceed, and, in no case, later than ten (10) days after such receipt. He/she/it shall prosecute the work in such a manner as to cause no unnecessary delays. The time of beginning, rate of progress, and, time of completion are all essential elements.

2. PAYMENT. The Contractor will submit requests for payment on a claim form prescribed by the City, and attach to that claim form, his invoices for the work performed and accepted.

☒ 3. PROGRESS PAYMENTS AND RETAINAGE. The contractor may submit requests for payments no more often than every thirty (30) days for work performed and accepted under the contract. If the contractor is in compliance with the provisions of the contract, The Board will make payments for such work performed and completed, provided, however, that in any such case The Board will retain 10% (ten percent (10%)), if not otherwise specified) of the total amount owing to insure satisfactory completion of the contract. Upon final inspection and acceptance of the contract, the contractor will be paid in full. However, if the contract is in excess of \$100,000, the contract will be subject to the standard Board of Public Works & Safety escrow agreement.

The Board, the City Engineers, officials of the Office of Compliance of the City of Fort Wayne, and, any other City officials designated by The Board shall have access to the work sites and contractors' records at all reasonable times for inspection of the work performed under and in compliance with the contract.

Any inspection or failure to inspect by The Board or City does not relieve the contractor of the obligation to comply with all provisions of the contract.

*NOTE:

Those clauses of the General Provisions with the following box beside it will be applicable to the contract only if the box has a checkmark or "X" in it. Any question about the applicability of a General Provision should be brought to the attention of The Board.

The contractor fully warrants his work for one (1) year after written acceptance by The Board, and shall remedy at the contractor's own expense, any defects or problems occurring during that one-year period. In addition, The Board and the City shall be furnished with all manufacturer's and supplier's written guarantees and warranties covering materials and equipment furnished under the contract.

6. TERMINATION FOR CONVENIENCE. The Board can terminate the contract for the convenience of The Board at any time by providing a written notice to the contractor. If the contract is terminated by The Board pursuant to this clause, the contractor will be paid only for the work performed up to the termination, pursuant to this clause, all work, including any finished or unfinished documents, data, studies and reports prepared by the contractor pursuant to the contract shall become the property of The Board of the City of Fort Wayne.

If the contractor shall fail to fulfill its obligations under the contract in a timely and proper manner, The Board shall have the right to terminate the contract for default, by written notice. If the contract is terminated pursuant to this clause, The Board is not required to advance any further payments to the contractor. In the event of termination, all work, including finished or unfinished documents, data, studies, surveys and reports prepared by the contractor shall become The Board's property. Termination pursuant to this clause is not The Board's exclusive remedy and will not prejudice the right of The Board to take any other legal action against the contractor.

8. CHANGES. The Board may, at any time, by written order, make changes within the general scope of the contract. If any such change results in an increase or decrease in the cost of performance, time of performance, or any other material provision under the contract, The Board shall make an equitable adjustment in the contract price, time of performance, other provision. Any claim by the contractor for adjustment under this clause shall be submitted to The Board in writing within thirty (30) days after the issuance of the change order. All such change orders and resultant compensation shall be incorporated as written modifications to the contract. Any dispute as to an equitable adjustment shall be referred to the Director of The Board for his final determination, pursuant to the disputes clause of the contract; provided, however, that the contractor will proceed with the work as changed, even if there is a dispute.

9. ASSIGNABILITY. The contractor shall not assign or transfer any interest in the contract, including by assignment or novation without the prior written consent of The Board.

10. SUB-CONTRACTING. None of the services covered by the contract shall be sub-contracted or contracted out without the prior written consent of The Board. No subcontracts will be awarded to contractors, who have been debarred or suspended from doing work for the City of Fort Wayne or federally-assisted contracts.

13. CONTRACTOR'S INSURANCE. The contractor shall obtain and pay premiums for such public liability insurance, property damage insurance, and workmen's compensation as will fully protect it from claims under the Indiana Workmen's Compensation Act, and, from any other claims for damages to persons not covered by that Act, because of bodily injury, including death, which may arise from, or during the performance of the work described in the contract. The City shall be named as an additional insured on each such policy. Proof of all such insurance shall be presented to The Board. The contractor further agrees that it will indemnify and hold The Board and the City of Fort Wayne harmless from any loss, damage, liability, cost or expenses occurred by the contractor, any of its agents, employees and

sub-contractors, in the performance of the contract, as well as the failure of the contractor or of any agents, employees, or sub-contractors to comply with any of the provisions of this clause.

14. CONTRACTOR'S PROTECTION OF WORK AND SAFETY.
